OUR SERVICES

PEST CONTROL

STERILIZATION AND
DISINFECTION

FUMIGATION

Using the latest innovative methods, our specialized team, with extensive experience and deep knowledge of the characteristics of each pest, offers effective solutions for controlling ants, cockroaches, fleas, flies, mice, moths, rats, spiders, stinging insects, and more. We comprehensively cover 36 of the most common pests, giving you peace of mind.

In addition, we excel in controlling termites, bed bugs, and rodents, as well as treating mosquitoes and ticks.

PEST CONTROL SERVICE

Pest control is one of the most important services offered by our company, as we strive to provide a clean and healthy environment for our customers.

We are fully aware that harmful insects can cause major problems, whether in homes or commercial establishments, and therefore we offer our specialized solutions to control all types of insects.

At our company, we adopt a comprehensive approach to pest control, using the latest technologies and environmentally friendly materials to eliminate insects effectively and permanently. Our services include a thorough analysis of the problem and the development of a customized action plan for each client, ensuring that the desired results are achieved as quickly as possible.

AMONG OUR SERVICES

- Termite control
- Cockroach and ant control
- Bed bug control
- Moth and fly control

At Future Global Company, we understand that pest control is not just about eliminating existing pests; it's also about preventing them from returning in the future. That's why we offer a comprehensive range of pest control services that not only eliminate current infestations but also help to protect your home or business from future problems. Our company is a pioneer in the field of pest control, where we have a trained and qualified team that ensures the delivery of service at the highest level of quality and professionalism.

STERILIZATION AND DISINFECTION SERVICES

Sterilization and disinfection services are essential for maintaining health and safety, especially in the current health conditions.

At our company, we offer effective solutions for sterilizing and disinfecting homes and commercial establishments using the latest technologies and high-quality approved materials.

Whether you are sterilizing your home, office, school, or any other place, our expertise and deep knowledge ensure that you get a clean and safe environment.

We use approved and effective sterilization products that eliminate germs and viruses effectively without affecting the health of the environment or the safety of people.

OUR SERVICES INCLUDE:

- Sterilization and disinfection of internal and external spaces
- Disinfection of furniture and surfaces with safe and effective materials
- Sterilization of public places such as schools, restaurants, and offices

In our company, we are keen to provide a comprehensive service that includes a thorough analysis of the space to be sterilized and the development of a customized plan to ensure complete coverage and maximum effectiveness. We are also committed to quality and professionalism in every step of the work, to ensure the comfort of our customers and their confidence in our services.

FUMIGATION SERVICES

Fumigation is an essential service that we offer, especially for the fumigation of silos and grains to control wheat and rice weevils, as well as palm weevils. It is an effective and safe way to control insects and rodents.

OUR FUMIGATION SERVICES ARE DISTINGUISHED BY THE FOLLOWING:

- Use of modern fumigation techniques in safe ways that ensure comprehensive coverage of the areas concerned. Use of high-quality approved fumigation materials (grain fumigation tablets) that effectively eliminate insects and rodents while taking into account environmental health and human safety.
- A trained and specialized team in carrying out fumigation operations efficiently and professionally.

Fumigation is a comprehensive solution for sterilizing and disinfecting spaces, whether inside homes, offices, hospitals, agricultural areas, or any other place.

Using fumigation ensures a clean and healthy environment and reduces the risk of disease transmission.

6

SUSTAINABILITY

We pay great attention to environmental conservation and sustainability. We use safe and effective pesticides that are environmentally safe, and we rely on environmentally friendly technologies in our operations.

All our materials are approved by the Saudi Food and Drug Authority

Our materials are safe for children's health and the premises are evacuated for only one hour during the sterilization period

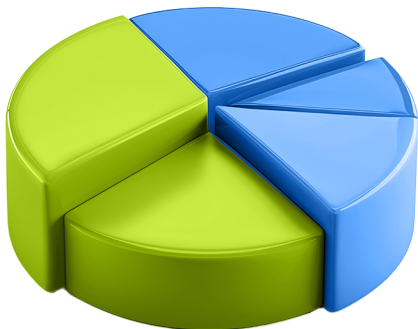

7
